Education

PhD Candidate Bioinformatics

Tübingen, Germany

EBERHARD KARLS UNIVERSITÄT TÜBINGEN

2024 - Present

- **Tentative title:** "Toward a Spatiotemporal Understanding of Glioblastoma Development"
- Focus on statistical machine learning and Bayesian modelling of spatial transcriptomics data.
- Involved in the bioinformatics analysis of spatial transcriptomics, single-cell RNA-seq, and bulk RNA-seq data.

M.Sc. Bioinformatics

Tübingen, Germany

EBERHARD KARLS UNIVERSITÄT TÜBINGEN

2021 - 2024

- **Master thesis:** "Derivative Gaussian Process for scRNAseq Data using Combination Covariance Functions"
- Focus on statistical machine learning, modelling, and simulations.
- **Final grade:** 1.1

B.Sc. Bioinformatics

Jena, Germany

FRIEDRICH-SCHILLER-UNIVERSITÄT JENA

2018 - 2021

- **Bachelor Thesis:** "Quantitative Characterisation of Biomarker Distribution in MSOT Images of a Preclinical Sepsis Model"
- **Final grade:** 1.3

German general higher education entrance qualification (Abitur)

Erfurt, Germany

EDITH STEIN SCHULE

2010 - 2018

- **Final grade:** 1.6

Skills

Programming	Python, Java, R, Stan, LaTeX, C++, SQL
Computer	Microsoft Office, Git/ Github, Linux (Servers)
ML/ Statistics	Bayesian modelling, Gaussian processes, Various ML methods
Languages	German (native language), English, Italian

Experience

Student research assistant

Eberhard Karls Universität

Tübingen, Germany

CLINICAL BIOINFORMATICS AND MACHINE LEARNING IN TRANSLATIONAL SINGLE-CELL BIOLOGY DEPARTMENT

2023 (3 months)

- Research and implementation of combination derivative kernel functions for Gaussian processes.

Student research assistant

Eberhard Karls Universität

Tübingen, Germany

QUANTITATIVE PROTEOMICS DEPARTMENT

2023 (3 months)

- Development of software to automatically evaluate mass spectrometry data generated by the MaxQuant software.

Tutor

Friedrich-Schiller-Universität Jena,

Germany

THEORETICAL COMPUTER SCIENCE DEPARTMENT

2020 - 2021 (3 semesters)

- Correcting and discussing exercise sheets for subjects in theoretical informatics including algorithms, data structures and complexity.

Publications

G-LATO: Inference of Spatial Latent Ordering via Deep Gaussian Processes

bioRxiv preprint

PREPRINT

2026

Zago M., Mukherjee S., Schleicher J. T., Bürkner P., Tabatabai G., Claassen M.

Genome-wide CRISPR-Cas9 screens identify BCL family members as modulators of response to regorafenib in experimental glioma

Neuro-oncology

JOURNAL ARTICLE

2025

Haeusser I., Becker H., Kuhlburger L., **Zago M.**, Walter B., Tsiami F., Erdmann S., Trampert J., Surender S., Stahl A., Templin M., Wegner E., Schmidt T., Schmees C., Casadei N., Sevenich L., Claassen M., Nahnsen S., Beck S., Merk D., Tabatabai G.

Effects of segmentation errors on downstream-analysis in highly-multiplexed tissue imaging

PLOS Computational Biology

JOURNAL ARTICLE

2025

Bruhns M., Schleicher J., Wirth M., **Zago M.**, Babaei S., Claassen M.

Latent variable estimation with composite Hilbert space Gaussian processes

arXiv preprint
